Charles University Central Catalogue
The Charles University Central Catalogue enables users to find documents in the libraries of all faculties and parts of Charles University.

The search can be narrowed to find only selected types of documents:
books (including textbooks)
e-books
periodicals
electronic journals (paid subscription)
final theses

There is a catalogue manual.

Charles University E-resources Portal
The Charles University E-resources Portal (PEZ in Czech) enables users to search in databases of academic texts. The Portal contains databases of electronic resources, an electronic journals portal, and e-books. The Portal offers a range of resources accessible via subscriptions paid at University level or faculty level, plus freely accessible resources, trial access to some resources, and links to other meta-resources similar to the Portal.

The Portal is accessible to all University students and staff, as well as to external users of the University’s libraries (subject to conditions stipulated by individual libraries of faculties and other parts of the University).

The Portal can be accessed directly from any computer connected to the Charles University network or a network of a faculty or other part of the University; the system automatically logs users into the Portal, so there is no need to enter an ID or password. Charles University staff and students can also use remote access to the Portal.

There is also a Facebook page and an EIZ blog where you can find updates on Charles University e-resources and systems (PEZ, MetaLib, SFX, EZproxy, Shibboleth, Verde).

University Digital Repository - DigiTool
The University Digital Repository enables users to access the following digital collections:
• Historical collection of the Faculty of Law Library
• Historical holdings of the Faculty of Arts Library (Corpus scriptorum ecclesiasticorum Latinorum)
• Map collection of the Faculty of Science Library
• Historical documents of the Charles University Archive
• Articles and dissertations on economics (CERGE-EI)
• Personal libraries of prominent figures from the 19th and 20th centuries
• Digital versions of frequently requested documents, available from special terminals at University libraries
