Study in Czech

All study programmes taught in Czech can be found in the Student Information System, in the database of admission requirements (sorted according to individual faculties):

Study programmes in Czech

Language requirements
Applicants who have completed their secondary education outside of the Czech Republic may be required to demonstrate their Czech language proficiency. Each faculty has different language requirements. Some faculties require a language certificate (e.g. B2, B1, etc.), some have their own Czech language test integrated into the entrance examination. For others, it is sufficient proof when the applicant passes the entrance exam, fully conducted in the Czech language. Specific language requirements can be found in the database of admission requirements or contact the admission office of the respective faculty.
