Expertise in Longevity and Long-term Care

The CELLO?ILC is a specialised interdisciplinary research centre focused on longevity and aging-related issues with emphasis on applied research, public policies and policy-oriented research, and evidence-based practice in the management and delivery of long-term care and support services. Recently, the Centre implemented several research and development projects for the Czech Government (Ministry of Health) and for the regional governments. It is a member of the Global Alliance of International Longevity Centres. The CELLO co-operates with international organisations (WHO, EUGMS, INTERDEM, Alzheimer Europe, Eurocarers, etc.) and participates in international projects (ELTECA, FRAM, INNOVAGE, PALLIARE, INDUCT etc.).
